

**Made From
100% Recycled Rubber**

Rubber Mulch

The innovative alternative to conventional mulching

Replace traditional loose-fill materials with Rubber Mulch that is made from 100% recycled tires. Organically dyed and non-toxic to children, pets and the environment.

Certification # F1292-13

Made from recycled rubber

- Non-toxic
- Environmentally friendly
- Durable and long lasting
- Low maintenance
 - Resists blowing away and compression
- Meets IPEMA ASTM F1292-13 Impact Attenuation Specification

Multiple Applications

Residential

- Flower Beds
- Pots
- Playground
- Landscaping
- Pathways
- Pool & Pond Borders

Commercial

- Landscaping
- Playground
- Golf Courses

Clean and Easy

- Anti-fungal
- Anti-bacterial
- Resists mold and mildew
- Does not absorb moisture

***Available in a wide range of colors.**

Made From 100% Recycled Rubber

Rubber Mulch

Advantages

Made from 100% recycled tire buffings, Rubber Mulch is the innovative alternative to traditional loose-fill material. Organically dyed - making it non-toxic to children, pets and the environment. Rubber Mulch will not deteriorate, as confirmed by independent lab tests, making it ideal for residential and commercial applications.

Multiple Benefits

- Will not decompose, rot or decay
- Helps prevent weed growth
- Will not flow or blown away (5 times heavier)
- Non-Toxic (organically dyed)
- Helps soil to stay moist enabling plants to thrive
- Will not fade, UV coated
- Is latex-free and 99.9% metal free
- Will not compact
- Discourages insects, especially termites
- Durable and long lasting

Recommended Landscape Depth

- 1-1.5 inches

Cost Effective

- Saves the user up to 75% over a ten year period

Multiple Applications

- Landscaping
- Gardens
- Playgrounds
- Pool and Pond borders
- Parks
- Golf Courses
- Nature Trails
- Gas Station Borders

Coverage

- 20 lbs. per 13.5 square feet
1,000 lbs. per 650 square feet

Note: The area of coverage is an approximate number and may vary according to how the mulch is distributed. Use a woven weed fabric when installing Rubber Mulch.

1,000 lbs of Rubber Mulch is 2.2 cubic yards of actual product, but will cover the same amount of area at 1.5 inches in depth as 7 yards of wood mulch, at 4 inches in depth.

1,000 lbs of Rubber Mulch provides the same coverage as 7 yards of traditional mulch.

While traditional mulches fade and disintegrate in weeks, Rubber Mulch can stay fresh and vibrant for up to ten years.
